

Q: 3

1) Student (2) faculty

first I have to give permission to student user from university_data user.

⇒ grant select on Student.* to "Student"@"localhost";

⇒ grant insert on student.* to "student"@"localhost";

⇒ grant delete on student.* to "Student"@"localhost";

Now I have to give permission to faculty user (having faculty table) from university_data user.

⇒ grant update on ~~stud~~faculty.* to "faculty"@"localhost";

⇒ grant insert on faculty.* to "faculty"@"localhost";

⇒ grant delete on faculty.* to "faculty"@"localhost";
