PESHAWAR CAMPUS

Project Points:	Milestone 2 -	**Semester**:	Spring 2021
Date Set:	*2nd June, 2021*	**Due Date**:	*8th June, 2021*
Course:	Database Systems	**Instructor**:	Ms. Safia Fatima

This is with regards to the second milestone that each group will submit for their semester project in the course of Database Systems. Before moving on to what you need to do for submitting the first milestone, here are some important points that should be considered, so there's no room for confusion:

- A group can have a maximum of 3 members only and if someone wants to do the project alone, he/she can do so as well.

- There will be only one submission for each milestone per group. So if one person from your group has submitted the milestone, you do not need to submit again.

- The deadlines for each milestone shall be strictly met otherwise your group might be penalized.

1. Entity Relationship Diagram (ERD)

You need to create an ERD about your project. It is **very important** that you develop the ERD on your own and not copy it from online as it will be immediately canceled.

You need to keep in mind the following points in particular:

1. Give suitable entities and entity attributes.

2. Draw proper relationships between entities.

3. Also give cardinalities like one-one, one-many, many-many.

3. Submission

You need to create a pdf containing your ERD for the project and the names of all members of your group.
